

Resume – Sony Harianto (Data Architect)

Summary

A Senior Data Architect with over 17 years of experience in leading data architecture and data management initiatives across multiple industries, including banking, insurance, and consumer goods.

Proven expertise in designing and implementing data governance frameworks and Master Data Management (MDM) solutions to address challenges such as data silos, inconsistent reporting, and data quality issues.

Experienced in establishing robust data governance practices covering data quality, lineage, and stewardship to support enterprise-wide data reliability and compliance requirements.

Strong focus on driving business value through well-structured data foundations, supporting analytics use cases such as customer insights, sales performance, and operational efficiency across sectors.

Area of Expertise

1. Data Architecture, Modeling and Schema Design
2. Database Management Systems (e.g., SQL, NoSQL)
3. Data Integration and ETL (Extract, Transform, Load)
4. Master Data Management Implementation (Informatica, etc.)
5. DWH, Data Lake and Big Data Implementation (Hadoop, Spark, etc.)
6. Cloud Data Solutions (AWS, Azure, GCP)
7. Data Governance, Quality Assurance and Management
8. BI and Analytics Platforms
9. ML and AI Integration with Systems
10. Agile Project Management Methodologies
11. Stakeholder Engagement and Communication

Professional Certification

1. Certified Scrum Master (CSM)
2. Microsoft Azure Data Engineer
3. CDMP – DAMA Data Management

Education

1. Bachelor of Information System – STMIK Indonesia (2014)
2. Master of Computer Science – Nusa Mandiri University (2026)

Recent Professional Experiences

2019 - 2026

- A Data and Solution Architect with experience leading end-to-end data initiatives across multiple industries. Proven in driving data management, architecture design, and delivery execution for scalable data platforms.
- Led the implementation of Master Data Management (MDM) solutions to unify disparate data sources and improve data consistency across enterprise functions.
- Acting as Solution Architect and Delivery Lead for data platform and data warehouse projects, including cloud-based implementations on Amazon Web Services (AWS).
- Experienced in managing cross-sector data initiatives, ensuring successful delivery beyond banking use cases, with relevance to consumer goods domains such as sales and supply chain analytics.

2017 - 2019

- As System Architecture designer as well as an implementer HRZERO product improvement in NTT Data Indonesia using the native Kubernetes Orchestrator (k8s) and the Python programming language.

2014 - 2017

- Worked as Database Engineer to implement NGOSS Dashboard to monitor traffic voice and data on Telkomsel.
- As Data Engineer to Implementation Telecom Big Data on Telkomsel using Hadoop (HDFS), Cloudera as Data Management and Analytics, MongoDB as ODS, Apache Spark as Stream Analytical, and Pentaho as Data Integration tool.

2009 - 2014

- IT Support for daily operation at Java Pos National Network (JPNN) in the West Sumatera area.
- IT Network Administrator who managed the network topology and infrastructure at Java Pos National Network (JPNN) in the West Sumatera area.
